Lisa et al, I looked at A68 yesterday and the ice has not changed. There was signs of water around the cu lvert so maybe the gauge itself is working inside. The river is quite low! The south-facing slopes are all pretty bare - not much if anything expected as runoff unless we start getting storms. Bill

Happy Friday.

Deliberative Process/Ex. 5

To Buck, Ray, and Barb, thank you very much for being willing to take on this extra work and funding if EPA was not able. It's much appreciated.

Have a great weekend.
